CERTIFIED RETURN RECEIPT
P 074 978 733

Mr. William Moeller
Chief Executive Officer
American Consolidated Mining Company
405 South 100 East, Suite One
Pleasant Grove, Utah 84062

Dear Mr. Moeller:

Re: Supplemental Information Request, American Consolidated Mining Company,
Yellow Hammer Mine Site Exploration, M/045/019, Tooele County, Utah

On May 8, 1990, Wayne Hedberg and Tony Gallegos, Division Minerals staff, inspected American Consolidated Mining Company's (ACMC's) Yellow Hammer mine site. Exploration/development core drilling was occurring at the time of the minesite inspection. It was noted that several holes had apparently been drilled outside of the permitted disturbed area boundary for this minesite. You indicated that a total of 19 holes were being drilled in the immediate vicinity of the Yellow Hammer mine to better delineate the extent and trend of the ore body.

While on site, your associate, Mr. Ernie Chandler, showed Division staff a map and a magnetic survey mylar overlay of the Yellow Hammer mine site area. The Division requests a copy of the map(s) showing details of all drill hole locations and the access roads used/created as part of the exploration/development work. ACMC will be held responsible for assuring that proper hole plugging procedures and reclamation of the surface disturbances associated with the exploration project are completed in a timely manner. Hole plugging should be conducted according to the provisions as outlined under Rule R613-004-108. A copy of our exploration progress report, Form MR-EPR, is enclosed for your reference in responding to the status of this drilling program and the hole plugging/reclamation requirements.
